

Hello,

We were told by Professor Mark to add in this read me file, so the marker can see it and even confirm with him if need be; he told us it is fine if we can get whatever working action cards we have into the GitHub folder, he said the remaining can be worked on going forward. He also mentioned that this adjustment shouldn't affect anything for this iteration. Originally it was that we could send in the two we can do and leave out the other two, but we were able to get more than that done. Thank you.
