

Hello, please find below some additional details to know about the game board:

- To change the colour for the game board to one of the 8 colour options, you click on the settings button from the start up page, then keep choosing the provided options until you get to the colour options.
- After each player makes a move, the player should ensure to click the “End Turn” button so the turn can go to the next player to make their move.
- We put the option to display letters to help children with colour vision deficiency to be engage with the game and be able to play as well, please find the images of how it will look in the “Colour deficiency document” also provided in this iteration 4 submission.
